

**IN THE SPECIFICATION:**

Please amend the specification as follows:

[0020] According to one or more embodiments, the flexible belt or main body 12 includes a polymeric belt. Preferably, the belt or main body 12 includes a plurality of wires 13~~(not shown)~~ running longitudinally through the interior of the belt to provide strength to the main body 12. Such belt constructions having longitudinally extending wires embedded in a polymeric belt are known in the art.
